MEMORANDUM FOR Commanders, Major Subordinate Commands/Units Reporting Directly to FORSCOM

SUBJECT: United States Army Forces Command (FORSCOM) First Quarter Risk Assessment, Fiscal Year 2007

- 1. The Soldiers of FORSCOM upheld our motto of "trained and ready" during FY06, performing admirably in adverse conditions, against a reactive and thinking enemy. We are providing the regional combatant commanders with capable, adaptive warrior teams whose training and equipment is state of the art. Our nation requires that we continue to improve as we take on the challenges of the future.**
- 2. The FORSCOM fatality and accident rates declined during FY06 from FY05. This is a direct result of command emphasis on safety. Great work! Keep the focus on our goals—a 75 percent reduction in accidents by the end of FY08 from FY02. We're heading in the right direction, but we still have a lot of work ahead of us.**
- 3. To maintain our present azimuth, all leaders must pay special attention to the mandatory safety programs (MUST DO's) outlined on the Combat Readiness Center web site under the Commanders' Corner tab. I expect leaders to place additional emphasis on accident reporting, as well as the Army Readiness Assessment Program. The risks for the upcoming quarter include those associated with the autumn months. In addition to accident reporting and readiness assessment, leaders at all levels must stay alert for the high risk Soldier and be proactive in preventing the next accident.**
- 4. Our focus areas for the upcoming quarter are shown in the enclosed document.**
- 5. For additional information, contact LTC McLean, 404-464-5754 (DSN 367), or e-mail michael.mclean@forscom.army.mil.**
